

Race Officer Duty Approaching?

Being a Race Officer / Assistant:
Everything you need to know and more

Wednesday 31st March 2010 : 7:30 p.m.

Do you....

-get in a muddle with the flags?
-forget how to set a good course?
-forget the start sequence?
-forget how to time the boats?
-just want a recap about being a race officer or assistant?

Learn about all these things, or remind yourself if you already know, or be there to offer additional advice if you are already an expert.

There will also be a demonstration of the Spray EasyTimer software for timing the races. Find out why this was so successful at the regatta in September.

This evening is for everyone.

This is also a social evening....
The bar will be open.
